I am totally upset that the FCC would try and ban XM from performing traffic and weather. As a veteran of the US Navy I fought for the people in this countries rights to have freedom of speech and I feel XM is a way to do this. If I want to pay for a service then it is my hard earned american dollars. I switched to XM because every time I turned around my local radio stations where changing their formats to things I did not want so I got XM to listen to what "I" wanted to listen to. If XM provides me with weather and traffic that I like better than the local stations then I will use it. I am in total support of XM and will voice my opinions at the voting booth to any politician who wants to try and change this.
